

# Computer Science:Flat Classroom Project

---

Assignments – Week of October 10, 2007

*You should be through with the following by Friday at the end of class.*

## Day 1 - Wednesday

Review your assigned team for this project (look in your RSS reader) and you'll see the announcement – or you can go to - <http://flatclassroomproject.wikispaces.com/Groups>

Set up your Flat Classroom RSS TAB – Subscribe to the page edits for your wiki. Subscribe to the discussion for your wiki. **Print this page out and turn it in** the box.

Go onto the Ning and contact all of your partners (go to members and search or look for your partner. Greet them, let them know anything important for the future (like if you're out) or the things you're good at (I'm good at audio, I am good at editing wikis, etc.)

Print a copy out of your wiki. You will need to read it by Thursday in class.

## Thursday

Check your Flat Classroom RSS Reader

Check your ning and reply to any comments from group members (let them know you are there.) If they haven't replied to you yesterday, check in again.

Group Project: Analyze the strengths and weaknesses of your current wiki. Get with any other team mates that are in this classroom. Look at the wiki and discuss. Answer the wiki analysis worksheet (attached) – you will keep this – one per student – (Each group will meet with Mrs. Davis next week to discuss action plans.)

## Friday

Check your Flat Classroom RSS Reader Tab

Reply to any messages from your group members on the Ning – follow up with any who have not made contact. (Unless they are from Qatar – they are on break right now.)

Individual Discussion Posting – After you have analyzed the wiki, strengths and weaknesses – you are to post on the discussion tab a summary of your findings – each member posts. (The first one starts the thread and the others reply to it.)

Reflection Due: Post on your blog post about how you feel about the project so far. What are the things you need to do next to move towards editing the wiki and working on the video.

Create a group on the Ning – If you want to have a place for discussions on the ning – you may create one. You need to come up with a list of action items for editing on the wiki.

You may begin editing the wiki on Friday. Improving it, etc. Remember you must enter a comment on each edit (what you did and why.) First check the links and make sure they are all “alive.”

\*\*You should have already posted your introduction last week and subscribed your RSS reader to the Instructions page – check the instructions page wiki page every day – I may post from Maine (or the other teachers may as well.)
